

The Only DevSecOps Solution For Automated MuleSoft Code Review

80% Faster, Cheaper & Compliant MuleSoft Code Review
With Real-Time Code Scanning & API Health Monitoring

Driving Excellence and Innovation in DevSecOps Solutions

At Integral Zone, our focus is on delivering top-notch DevSecOps solutions that automate MuleSoft code review, provide real-time code scanning, and monitor API health.

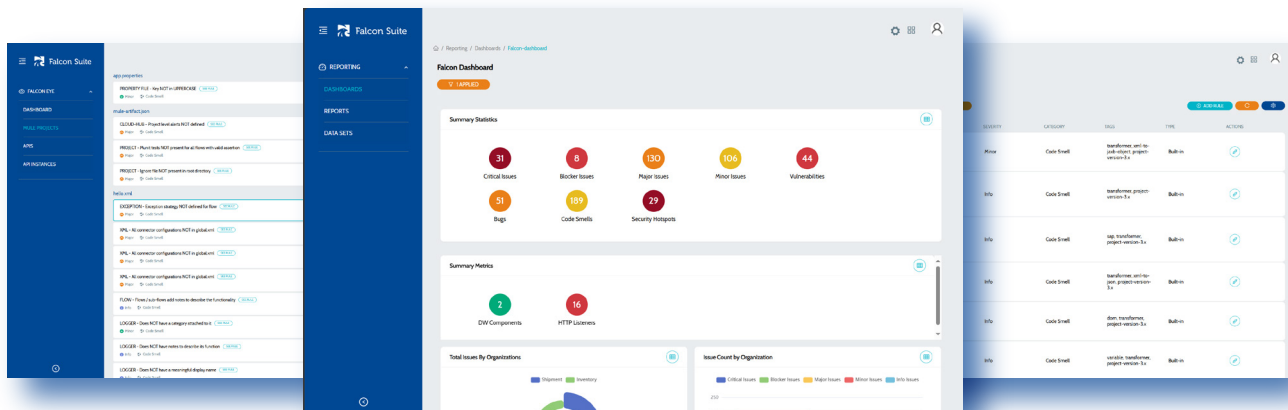

With a mission to help organizations achieve superior code quality and security, while significantly cutting down development costs and time. Trusted by leading Fortune 500 companies, we are dedicated to enhancing productivity and security in our clients' MuleSoft projects.

The Journey Of Groundbreaking Innovation

2016

Integral Zone was founded. As a MuleSoft services partner, we assisted major companies like HSBC, Unilever, and Roche in their digital transformation efforts.

2019

We embarked on the journey of developing our first product.

2020

IZ Analyzer was launched, revolutionizing the automation of Mule code reviews.

2021

Our product gained traction, with many Fortune 500 companies adopting it.

2022

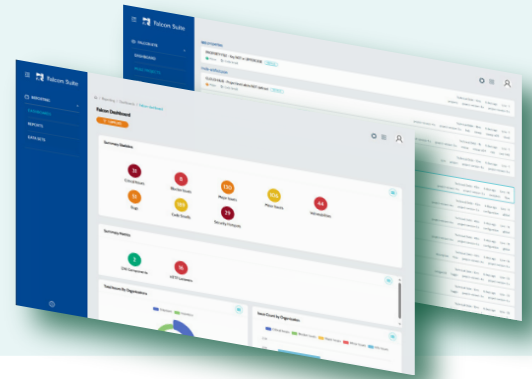

We expanded our product features to include WSO2 support, and the concept of Falcon Suite began to take shape.

2023

We introduced more advanced features, including enhanced test rules in the IDE, an analytics dashboard, API scanning, and streamlined support.

World's Only Complete Solution For High Quality, Secure & Compliant MuleSoft Code

Reduces Project Development Cost & Time By 80%

By merging real-time code monitoring with advanced automated scanning, Falcon Suite cuts code review time by up to 80%. This ensures that code quality is checked as soon as it's written, quickly spotting and resolving any issues, which helps speed up your development process.

There Is LITERALLY NO COMPARISON For Falcon Suite

MuleSoft Live Scans: Monitoring Project Health

Live project scanning promotes better code quality and adherence to coding standards. Strengthen your project and ensure resistance to cyber threats by identifying loopholes or weaknesses in the application.

API Vigilance: Real-Time Status Monitoring

Get real-time visibility into the performance & availability of APIs. Identify Potential problems proactively minimise service disruptions and reduce downtime.

Auto Discovery & Scanning Of Anytime Platform Assets

Continuous scanning ensures no issues are missed while new assets are deployed. Simplify audits and regulatory reporting, Meet compliance requirements and reduce the risk of non-compliance. Automated scanning helps identify vulnerabilities 24x7.

MuleSoft Anytime Platform Insights: Unified Reports Unlocked

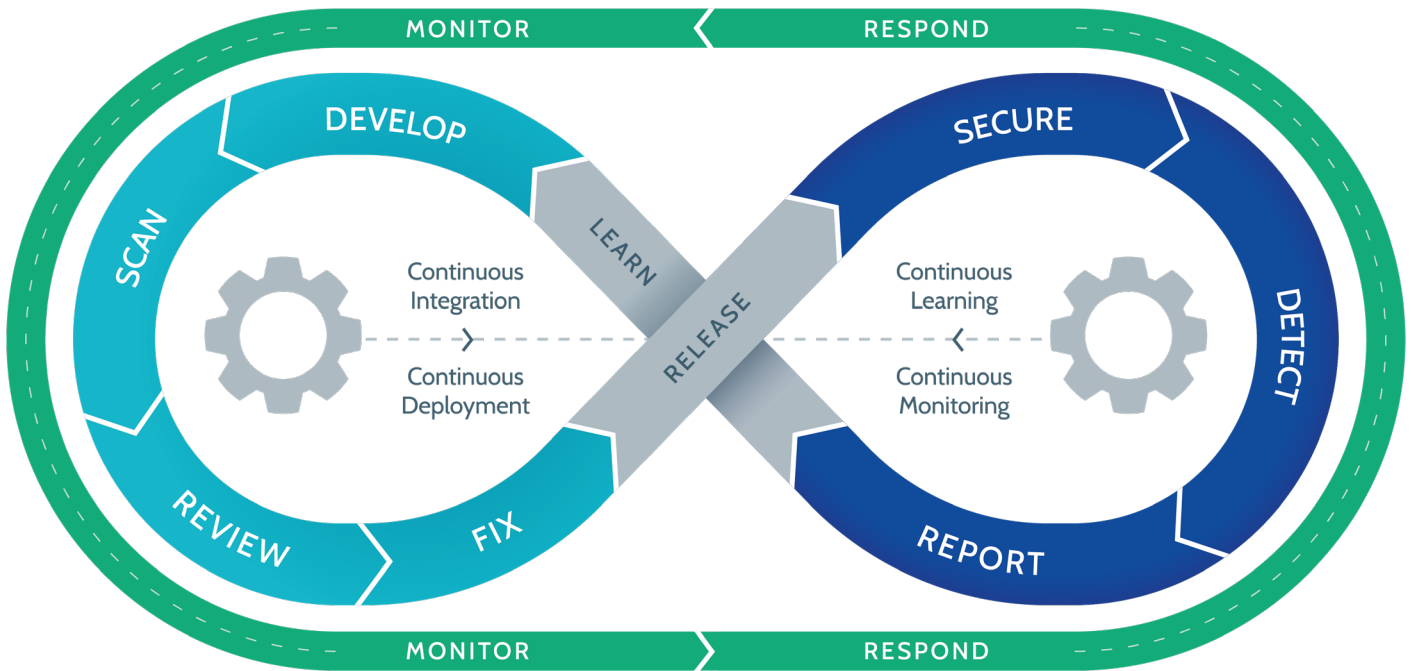

Get a holistic view of your organisation's digital assets, enabling stakeholders to assess the overall health and performance of various business groups, applications, and APIs in one place. Centralised Analytics: Centralising data from multiple sources simplifies data analysis and helps identify trends, patterns, and opportunities for improvement across different business units and environments.

Custom Rules For Your MuleSoft Projects

Custom rules enable organisation-specific coding standards and best practices across your MuleSoft integration projects. Custom rules help adhere to industry-specific compliance requirements.

Seamless Integration With The Anytime Platform

Seamless integration with Anypoint Platform allows for a one-click scan of all your anypoint platform deployed assets. Single Sign-on with the Anypoint platform eliminates the need for additional software.

Every MULESOFT PROJECT Needs Falcon Suite

Falcon Scan

AUTOMATED MuleSoft Code Review With In-line Code Scanning & Correction

Continuously monitors active MuleSoft projects in real-time, scrutinising every line of code for potential quality issues.

- Automate Manual Review To Speed Up Development.
- Enhanced Code Quality By Minimising Human Errors & Following Predefined Rules.
- Security & Compliance Checks For Protection against data breaches & mitigate any risks.

Falcon Eye

Ongoing Monitoring And Analysis After Deployment To Maintain System Integrity.

Continuously monitors active MuleSoft projects in real-time, scrutinising every line of code for potential quality issues.

- Continuously checks for and resolves new vulnerabilities as they arise.
- Helps in adapting to changes in the system environment without disruptions.
- Facilitates ongoing optimisation of system performance and security.

Falcon Pulse

Monitors API connections, ensuring their uninterrupted functioning. With real-time API health monitoring.

- Instant alerts on performance degradation or failures.
- Quick response to API issues, reducing potential downtime.
- Ensures APIs meet performance standards continuously.

80% Faster Code Reviews with Real-Time Monitoring

By merging real-time code monitoring with advanced automated scanning, Falcon Suite cuts code review time by up to 80%. This ensures that code quality is checked as soon as it's written, quickly spotting and resolving any issues, which helps speed up your development process.

Stay Ahead of Issues with Proactive Monitoring

With Falcon Suite, your team can detect and address potential bugs, security vulnerabilities, and other code quality issues early in the development cycle. This proactive approach prevents small problems from becoming big issues, saving time and reducing development costs.

Reliable API Health Monitoring

Keep your API connections running smoothly with Falcon Suite's health monitoring feature. It watches over your APIs continuously, alerting you instantly if there are any performance issues or downtime, ensuring that your applications remain operational and reliable.

Seamless Integration for Better Workflow

Integrate Falcon Suite seamlessly into your development environment to empower your team to produce cleaner code and maintain a strong API ecosystem. This integration simplifies your development process, enabling a more efficient and error-free workflow.
